DETAILED ACTION

1. Claims 1-23 and 70-75 are presented for further examination.

Allowable Subject Matter

2. Claims 1-23 and 70-75 are allowed.

As per claims 1-23, specifically claim 1 and in light of the applicants Remarks in the Amendment filed on 9/6/2005, the prior art of record fails to teach a motion control system comprising all of the claimed features, wherein the claimed system eliminates the need for timer circuits, as taught by Aoyama' servo amplifiers, while maintaining communication between the central controller and each slave by utilizing a phase locked loop timing mechanism, thus resulting in a system having a capability to continuously adjust the timing, thereby offering a system with more flexible and accurate timing, in combination with the other claimed features and or limitations as claimed.

As per newly filed claims 70-75, specifically independent claims 70, 71 and 72, the same reasons for allowance, as previously discussed in the Office Action mailed on 11/3/2004, are applied equally herein, since these newly filed independent claims correlate to the allowable subject matter of dependent claims 17, 18 and 20. Reference is made to the Office Action mailed on 11/3/2004 for providing adequate discussion for the Reasons for Allowable Subject Matter with regards to each of the aforementioned independent claims, that is, claims 70, 71 and 72, in combination with the other claimed features and or limitations as claimed.
